● ABOUT ME

In 2020, I pivoted from construction to web development because code provided a flexible tool for finding strategic solutions to the world's pressing problems. I thrive on bringing ideas to life, identifying and fixing bugs, and fine-tuning projects with every commit. My diverse problem-solving skills and passion for coding enable me to tackle complex software engineering challenges with perseverance.

● TECHNICAL SKILLS

Languages & Frameworks

JavaScript, TypeScript, React, React Native, Remix, NodeJS, Ember.js

Tools & Platforms

Git, Sass, Google API, OpenAI, Slate, Vercel, Docker, Cypress, MSW, Jira, GitHub Actions, CircleCI, Linear

● EXPERIENCE

Software Engineer [Hypercontext \(previously Soapbox\)](#) May 2021 - Present

- Worked in a fast-paced Agile environment, contributing to a comprehensive meeting management platform that enables effective one-on-ones, structured team meetings, and company-wide discussions.
- Investigated and resolved high-priority bugs, enhancing user experience and directly contributing to a sustained Net Promoter Score (NPS) average of 40 over six months.
- Designed and developed a scalable micro-frontend service to seamlessly integrate meeting information within video conferencing platforms.
- Delivered robust, maintainable code by implementing comprehensive testing strategies.

Notable Contributions:

Micro-frontend for video display

- Designed and developed a micro-frontend to display relevant meeting information on popular video meeting platforms such as Google Meet and Zoom
- Developed and deployed a countdown timer feature to help users manage time effectively during meetings
- Collaborated with product design teams to implement pixel-perfect user interfaces

Goal-Sharing Platform Enhancement

- Developed and launched a dynamic goal-sharing interface that increased team collaboration
- Engineered real-time updates using Ember.js data-binding, improving user experience
- Implemented role-based access controls, ensuring secure goal management for enterprise clients

● EDUCATION

Web Development Diploma

BrainStation

OCT 2020, TORONTO, ON

● SIDE PROJECTS

[VidToTable.com](#)

A website that pulls recipes from popular creator videos

[LittleJourney.ca](#)

Building an AI-powered daycare search engine, match-maker, and waitlist tool for Canadian parents and childcare centers.

[ThingsThatDontSuck.xyz](#)

Building a searchable database of products that are built to last—to help people support companies that are creating sustainably.

● INTERESTS

Building and maintaining open-source projects using emerging technologies

Contributing technical expertise to non-profit organizations

Developing side projects to experiment with new frameworks and architectures

Food enthusiast exploring diverse cuisines and restaurants

Mechanical enthusiast: Built two custom motorcycles and currently restoring a 1993 Mazda RX-7 FD
